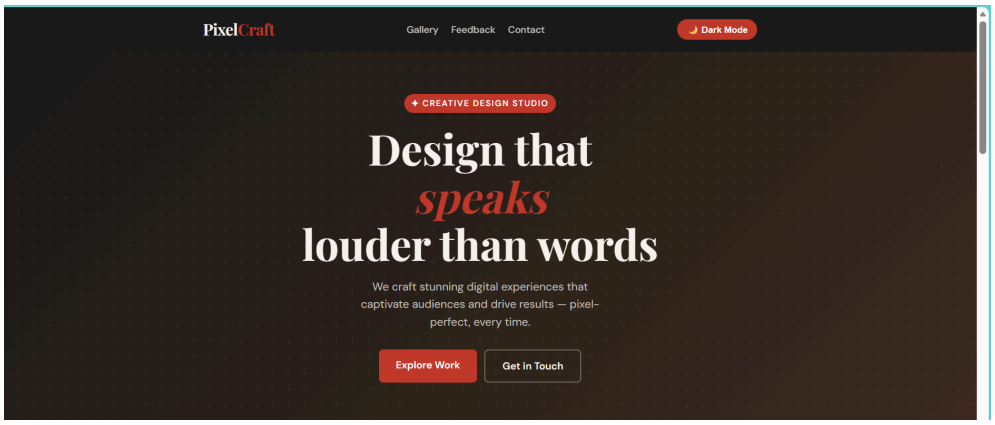
AI Assisted Coding Assignment-14.2

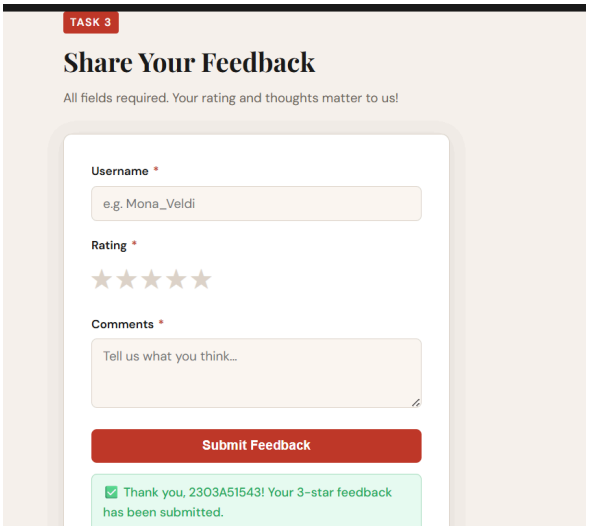
> 2303A51543 BT:29 VELDI.HRUTHIKA 31-3-26

💡 Task Description 1 – (Landing Page Design)
• Create a simple landing page for a product or service. Include a header, hero section, and footer.
Requirements:
• Use HTML and CSS to structure the page.
• Use AI to suggest layout alignment and typography.
• Ensure the page is responsive across devices.

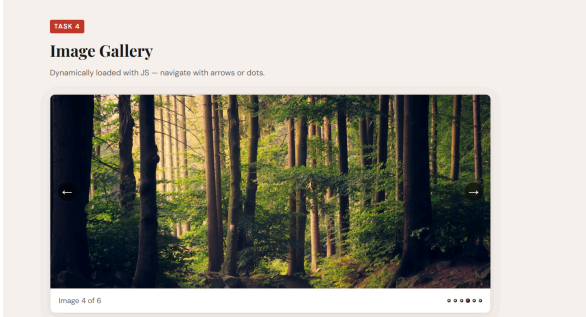


💡 Task Description 2 – (Theme Toggle Feature)
• Provide a button to switch between light and dark themes..
Requirements:
• Use JavaScript to toggle CSS classes.
• Use AI assistance to manage color contrast and accessibility.
• Ensure theme preference applies instantly on click.

💡 Task Description 3 – (User Feedback Form)
• Create a feedback form with fields: Username, Rating, Comments.
Requirements:
• Use JavaScript to validate required fields.
• Display success or error messages dynamically.
• Use AI to improve form usability and layout.



Task Description - 4 (Image Gallery with JavaScript)
• Task: Display a small image gallery on a web page.
Requirements:
• Use JavaScript to dynamically load images.
• Add next/previous navigation buttons.
• Use AI to optimize layout responsiveness.



Task Description - 5: (Notification Banner)
• Display a notification banner at the top of the page.
Requirements:
• Use JavaScript to show and hide the banner.
• Style the banner using CSS.
• Use AI to ensure smooth transitions and clean UI behavior.

  /* ═══════════════════════════════════════════════════════
     TASK 4: Image Gallery
     - Images are dynamically created and injected into the DOM
```

```
     - currentIndex tracks which image is shown
     - showSlide() toggles the "active" class for CSS fade
     - Prev / Next buttons decrement / increment the index
     - Dot indicators are also generated dynamically and sync
       with the current slide
     - Auto-advances every 4 seconds (auto-play)
  ═══════════════════════════════════════════════════════════ */
